MÖSSBAUER SPECTROSCOPY NEWSLETTER

October 2017

World directory of Mössbauer spectroscopists at the Mössbauer Effect Data Center

Rile Ge, Dénes Lajos Nagy¹, Junhu Wang and Tao Zhang

Mössbauer Effect Data Center, Dalian Institute of Chemical Physics, Chinese Academy of Sciences, Dalian 116023, China

E-mail: medc@dicp.ac.cn

¹On leave from the Wigner Research Centre for Physics, Hungarian Academy of Sciences, P.O.B. 49, 1525 Budapest, Hungary

1. Introduction

Identifying members of a scientific community along with their reachability, affiliation, field of specific interest and access to their scientific output has always been an obvious need since the beginning of modern science. This was one of the major driving forces of the foundation of numerous learned societies in the 17th century many of which traditionally have had a network of 'corresponding members' who, according to the original meaning of the term, were accessed via postal correspondence.

From the 1960-ies, conventional card files of learned societies and scientific communities were step by step replaced by electronic registers. In this respect, the international Mössbauer community belonged to the pioneers. Starting with 1966, the editors of the Mössbauer Effect Data Index and, since 1979, the Mössbauer Effect Data Center (MEDC) as editor of the Mössbauer Effect Reference and Data Journal identified and stored the author list of Mössbauer papers in computer data bases. Based on this author list, around 1995 MEDC set up an electronic on-line directory the about 2800 items of which, beside the names, contained e-mail addresses, phone and fax numbers when available. Since most these latter data were extracted from publications, in this respect the directory

was pretty much incomplete and certainly contains names of numerous individuals who, although having co-authored Mössbauer papers, would never consider themselves to be Mössbauer spectroscopists. Furthermore, lacking personnel resources, the directory has been neither updated nor extended since about 2004. Indeed, the top-down approach of the directory with very limited feedback to the authors demands an effort from the MEDC staff that cannot be afforded. Still, this old MEDC Directory which is even now operational at the MEDC main page (<http://www.medc.dicp.ac.cn/>) under the name 'Old directory' [1], represents a considerable value both from practical and of historical point of view.

A different, bottom-up approach was used by the editors of MIX, a Mössbauer community website [2] and mailing list [3] developed in the 1990-ies in Budapest. Immediately after the launch of the project early 1992, a directory [4] has become operational and is operational since then, however became practically dormant in 1999. The input of this directory, containing 24 different fields, came directly from the individuals by filling in a web template [5]. Presently the MIX directory contains 171 entries many of them being outdated, though. Certainly, both the old MEDC and the MIX directory stem from the time well before the Web 2.0 era, i.e. when the technology of dynamic web pages and web applications was developed between 1999 and 2004. Therefore, even if in the case of the MIX directory the input was generated by the Mössbauer spectroscopists, the additional manual work from the editors was quite substantial.

The demand for an up-to-date and reliable world-wide on-line directory of Mössbauer spectroscopist gradually increased in the period 2000–2015. In the Constitution [6] of the International Board on the Applications of the Mössbauer Effect (IBAME) [7] approved in 2015 the foundation of the International Union of Mössbauer Spectroscopists is

envisaged. Such an international society, especially in its creation phase, unavoidably needs a reliable register of its potential members.

In 2014 MEDC decided to implement a new directory fully based on the bottom-up approach in frames of its long-term project ‘Mössbauer Effect Knowledge Center’ [8]. The purpose was to develop a reliable replacement for the outdated old directory so that the data will be entered and regularly updated by the individual scientists. As a completely new feature with respect to its predecessors, links to Research Gate, Google Scholar, ORCID, Resarcher ID and Scopus were planned in order to enable easy access to publications of individual Mössbauer spectroscopists both for the community and the MEDC staff.

Following a one-year period of design study and programming, the new MEDC directory started its test regime in August 2015. Admittedly, the test regime neither for the MEDC staff nor for the users was free from frustration. Problems arising included connectivity and stability issues, lost validation mails, fake error messages and others. We sincerely apologise for the inconvenience caused our test users and thank them for their patience and cooperation.

By October 2017, the system has become stable and reasonably well accessible for users all over the world so that, by publishing the present paper, the test regime is concluded and, from now on, the new MEDC directory has started its operation phase. Therefore, henceforth, the term ‘MEDC Directory’ will be used for the new web-application-based system.

The rest of the present paper contains an abridged version of the consolidated Users’ Guide of the MEDC Directory as of 5 November 2017 (version 2.0.3). The full electronic version of the Users’ Guide is downloadable from the footer [9] of the MEDC Directory web site [10]. As it contains numerous external and internal links, it can be very conveniently used in a second tab of the web browser while accessing the web application from the first one. We invite all Mössbauer spectroscopist to enter their public personal profiles in the MEDC Directory, the new element of the emerging Mössbauer Effect Knowledge Center.

2. The MEDC Directory

The MEDC Directory (MEDCdir) is the

MEDC's free online database of Mössbauer spectroscopists. It is a collection of public personal profiles (electronic ‘business cards’) of individuals who are using or are interested in the Mössbauer effect and its applications. In accordance with the Constitution of IBAME, the term ‘Mössbauer effect’ and ‘Mössbauer spectroscopy’ are used in a broad sense; they comprise conventional laboratory techniques and related methods such as nuclear resonance scattering of synchrotron radiation, inelastic nuclear scattering of synchrotron radiation, synchrotron radiation perturbed angular correlation, analytical and theoretical studies, etc.

Beside personal entries, MEDCdir also contains institutional entries for universities, research institutes, etc. (‘affiliations’) individual Mössbauer spectroscopists are affiliated with.

Personal entries in MEDCdir are created and maintained by their owners themselves. As a rule, institutional entries are created and maintained by the MEDC staff, however, also registered users (see below) may initiate creating or modifying institutional entries.

In order to ensure consistency of the service, new entries or modification of existing ones will be published only after having been reviewed by the MEDC staff, a step needing a few working days, as a rule.

MEDCdir is a free and public service, i.e. all personal profiles can be seen by anyone having access to the Internet. Therefore, you should enter only those personal data of yourself which you wish to share with anyone. Accordingly, there are only a few compulsory fields in the personal profiles those being the surname, the first (given) name, the given-name initials, the title, the affiliation, the country, the e-mail address and at least one field of scientific interest. Nevertheless, the more information you share about yourself, the more useful will be your personal profile for the scientific community.

From the point of view of MEDCdir, there are three kinds of individuals. A person browsing the Internet is a *visitor*. A visitor may see all MEDCdir personal profiles, however, will not be able to create or to modify either a personal or an institutional profile. A person having registered (i.e. created a personal account) on MEDCdir is a *user*. A user may initiate creating or modifying one personal and any number of institutional profiles. Users who have already created their personal profiles are called *authors*.

3. Information stored in MEDCdir

3.1. Personal information

Personal information belongs to a user (user information) or to an author (author information). All authors are users but only those users are authors who have already created their personal profiles ('business cards'). User information includes the user e-mail address, the user name, the password and an optional nickname. The rest of the personal information belongs to the author information. User information is not public. Apart from the password, user information can be seen by the MEDC staff (the MEDCdir admin). The password cannot be seen by anyone. In contrast to the user information, the author information is public and can be seen by anybody on the Internet.

User name

When you register, you will choose a user name. This user name will be used later for signing in to MEDCdir. Choose a simple user name that you can easily remember any time. Should you nevertheless forget your user name, please contact the MEDCdir admin at medc@dicp.ac.cn, however restoring your account cannot be guaranteed. This information is compulsory and non-public.

User e-mail address

When a visitor asks for registration, an e-mail address should be specified which the validation mail will be sent to. The confirmation of the validation mail is necessary for completing the registration. This address is not necessarily the same as the e-mail address appearing later in the author's personal profile. Should a user forget the password, this e-mail address will be used for creating a new one. Should a user forget the user e-mail address, the MEDCdir admin has to be contacted at medc@dicp.ac.cn. This information is compulsory and non-public.

Password

When you register, you will have to choose your own password as a user. It should ideally be more than eight characters in length, and consist of a mixture of letters, numbers and special characters. Should you forget your password, a new password can be requested which will be sent to the user e-mail address. This information is compulsory and non-public, and cannot be accessed by the MEDC staff either.

Nickname

As a registered user you may (but you do not have to) specify a nickname. This is a security measure for the case should you forget your user name. If you still remember your nickname, the MEDCdir admin may identify and restore your account. You may specify or modify the nickname anytime. This information is neither compulsory nor public.

Surname

Your family name or, should this term not be applicable, your last name used in international publications. Compulsory field, public information.

First name

Your given name or names within your family (e.g. 'John', 'Hans-Dietrich', 'Lev', 'Maria', etc.). Put here all given names that you are using regularly. Compulsory field, public information.

Middle name

Your middle name or names within your family (e.g. 'Theresia'), if any. Use this field also for patronymic (e.g. 'Nikolaevich'), if applicable. You may insert here also the dynasty (e.g. 'Jr' or 'III') if it occurs in your name. Public information.

Given name initials

The initial letters of your given (i.e. first and, eventually, middle) name or names (e.g. 'R. L.' or 'C.-J.') as used in international publications when only given-name initials and full last name are shown. Do not include the initial letter of your surname. Compulsory field, public information.

Title

Honorific (e.g. 'Dr', 'Prof') or civil (e.g. 'Ms', 'Mr') title. Select the most appropriate one from the drop-down list. Compulsory field, public information.

Informal name

The form of your name by which you prefer to be addressed informally, if this is not your full first name (e.g. 'Sasha', 'Bob', etc.). Public information.

Year of birth

The four-digit year in which you were born (e.g. '1984'). Public information.

Occupation

Your main occupation, position, job title or any combination of them (e.g. ‘Professor’, ‘Lecturer’, ‘Engineer’, ‘Student’, ‘Biologist, professor’). Compulsory field, public information.

Highest degree

Your highest degree (e.g. ‘DSc’). Public information.

Institution awarding degree

The institution which awarded your highest degree. Public information.

Year of degree

The year in which your highest degree was awarded. Public information.

Affiliation

The name of the institution or organisation (university, research institute, etc.) you are affiliated with. If you are retired, specify the organisation appearing in your recent publications. Select from the offered list or initiate creating a new affiliation (see below). Compulsory field. Public information.

Department or group

Your department or division within your organisation. Please specify always the entity immediately below the organisation you are affiliated with, even if it is called ‘Laboratory’, ‘Institute’, etc. rather than ‘Department’ or ‘Group’. Public information.

Position

Your formal position within your organisation (e.g., ‘Head of Group’, ‘Vice Director’, ‘PhD student’). Public information.

Street or P.O.B.

The street component of your address, including details of the district within a town or city. Alternatively, the P.O.B. address. Public information.

Postal code

The postcode or zip code of your address. Public information.

Town

Your city or town. Please add before the town the name of your state, province, county or region as used in your postal address, if appropriate (any standard abbreviated form

for postal delivery can be used). Public information.

Country

The country component of your postal address. Compulsory field, public information.

Phone

Phone numbers should include country and area codes; extension numbers may be added with a preceding ‘w’. Use the international standard format starting with a ‘+’ sign preceding the country code. For reasonably separating groups of digits within the phone number, use only the space character. Examples: +214 2 327 467, +428 37 456 0000w2743. Public information.

Mobile

Mobile phone numbers should include country and area codes. Use the international standard format starting with a ‘+’ sign preceding the country code. For reasonably separating groups of digits within the mobile phone number, use only the space character. Example: +214 160 564 9636. Public information.

Fax

Fax numbers should include country and area codes. Use the international standard format starting with a ‘+’ sign preceding the country code. For reasonably separating groups of digits within the fax number, use only the space character. Example: +214 56 754 9200. Public information.

Skype

Your Skype identifier (e.g. john3827_smith). Public information.

E-mail

Your e-mail address. Please provide the most general form of your e-mail address rather than one that includes the name of the specific computer at which you work, and which may, therefore, become invalid if this changes. Compulsory field, public information.

Web site

The URL of your (preferably English-language) personal web site (<http://...>). Use the encrypted URL (<https://...>) if available. Should you have no personal web site, you may enter here the web site of your group or your organisation if it contains relevant information

on your work. Public information.

ResearchGate

Your ResearchGate (<https://www.researchgate.net/>) identifier, if any. Please specify only the part appearing after ‘<https://www.researchgate.net/profile/>’ in your personal ResearchGate URL; the rest will be added automatically. Public information.

Google Scholar

Your Google Scholar (<https://scholar.google.com/>) identifier, if any. Please specify only the part appearing after ‘<https://scholar.google.com/citations?user=>’ in your personal Google Scholar URL; the rest will be added automatically. Should your page not be in English, please extend it with ‘=en’. Public information.

ORCID

Your ORCID (<https://orcid.org/>) identifier, if any. Please specify only the 19-character long part (e.g. 0000-0003-6439-9432) appearing after ‘<https://orcid.org/>’ in your personal ORCID URL; the rest will be added automatically. Public information.

ResearcherID

Your ResearcherID (<http://www.researcherid.com/>) identifier, if any. Please specify only the 11-character long part (e.g. B-0001-2014) appearing after ‘<http://www.researcherid.com/rid/>’ in your personal ResearcherID URL; the rest will be added automatically. Public information.

Scopus

Your Scopus (<https://www.scopus.com/>) identifier, if any. Please specify only the 11-character long part (e.g. 45387523659) appearing after ‘<https://www.scopus.com/authid/detail.uri?authorId=>’ in your personal Scopus URL; the rest will be added automatically. Public information.

Fields

Select your research field of interest. Selecting at least one field is compulsory. Public information.

Photo

You may upload your portrait in a format such as GIF, JPG (JPEG) or PNG. The size of the image should be ≤ 512 kB or 90 px \times 90 px. Public information.

3.2. Institutional information

Name

Official full name of the institution or organisation, preferably in English. Compulsory field, public information.

Type

Select the type of the institution or organisation from the drop-down list. Compulsory field, public information.

Street

Street (or P.O.B.) component of the address of the institution or organisation. Compulsory field, public information.

Postal code

Postcode or zip code component of the address of the institution or organisation. Compulsory field, public information.

Town

Town or city component of the address of the institution or organisation. Please add before the town the name of the state, province, county or region as used in the postal address (any standard abbreviated form for postal delivery can be used), if appropriate. Compulsory field, public information.

Country

Country component of the address of the institution or organisation. Compulsory field, public information.

Web site

Official (preferably English-language) web site of the institution or organisation. Compulsory field, public information.

4. Visitor's actions

A visitor (i.e. anybody on the Internet without having logged in to a valid MEDCdir account) can, on one hand, search for public information in MEDCdir and, on the other hand, can register on MEDCdir and, by creating a new MEDCdir account, become a MEDCdir user.

When visiting the MEDCdir web site at <http://www.medc.dicp.ac.cn/directory/> or navigating there from the MEDC main page (<http://www.medc.dicp.ac.cn/>), the primary search panel of MEDCdir will be opened in the main pane along with a right pane that facilitates logging in or registering on MEDCdir:

Location: Home > Directory

Search conditions

Surname: First name:

Given name initials: Occupation:

Affiliation: search Street or P.O.B.:

Postal code: Town:

Country: Phone:

E-mail: ResearchGate:

Google Scholar: ORCID:

If you are not yet registered in the MEDC Directory and would like to be included, please click here to register now.

4.1. Searching for public information in MEDCdir

Searching for author information

Visitors looking for information on Mössbauer spectroscopists may fill in one or more fields of the MEDCdir primary search pane. The string entered in a field means that the corresponding field of the wanted author should contain the specified string. Note that one can select more countries separated by comma. Selecting more than one checkboxes

in the ‘Fields’ list means that the wanted author has specified at least one of the checked fields of scientific interest. For selecting the affiliation please refer to the next section (‘Searching for affiliation (institution or organisation)’).

The following example shows how to search for Mössbauer spectroscopists from Germany or Hungary interested in experimentation, methodology and data handling or in hyperfine interactions.

Location: Home > Directory

Search conditions

Surname: First name:

Given name initials: Occupation:

Affiliation: search Street or P.O.B.:

Postal code: Town:

Country: Phone:

E-mail: ResearchGate:

Google Scholar: ORCID:

ResearcherID: Scopus:

Fields:

- Earth sciences and mineralogy
- Environmental sciences
- Experimentation, methodology and data handling
- Hyperfine interactions
- Industrial applications
- Materials science, metallurgy

Search result

By clicking the 'Search' button at the bottom of the pane, authors fulfilling all specified conditions simultaneously will be

listed. The list only shows an author summary information (portrait, name, country and e-mail address).

Location: Home > Directory

Search conditions

Search result

	Name: Nagy Country: Hungary E-mail: nagy.denes@wigner.mta.hu
	Name: Klencsár Country: Hungary E-mail: z.klencsar@mosswinn.hu
	Name: Alexeev Country: Germany E-mail: pavel.alexeev@desy.de
	Name: Spiering Country: Germany E-mail: spiering@uni-mainz.de
	Name: McCammon Country: Germany E-mail: catherine.mccammon@uni-bayreuth.de

By clicking the name link or the photo of one of the listed authors, their whole public

personal profile will be displayed.

Location: Home > Directory

	
Surname:	Nagy
Middle name:	Lajos
Title:	Prof
Year of birth:	1944
Highest degree:	Doctor of Science (DSc)
Year of degree:	1988
Department or group:	Department of Materials Science by Nuclear Methods
Street or P.O.B.:	P.O.B. 49
Town:	Budapest
Phone:	+36 1 392 2517
Fax:	+36 1 392 2598
mail:	nagy.denes@wigner.mta.hu
ResearchGate:	Denes_Nagy
ORCID:	0000-0002-6790-9505
Scopus:	35954247400
Fields:	Chemistry, structure and bonding Experimentation, methodology and data handling Hyperfine interactions Materials science, metallurgy Solid state physics and magnetism
First Name:	Dénes
Given name initials:	D. L.
Informal name:	Dénes
Occupation:	Physicist, Research Prof. Emerit
Institution awarding degree:	Hungarian Academy of Sciences
Affiliation:	Wigner Research Centre for Physics, Hungarian Academy of Sciences
Position:	Research Professor Emeritus
Postal code:	H-1525
Country:	Hungary

ResearcherID:	

From clickable links of the author's public profile (e.g. 'ResearchGate', 'Web site') one may navigate to these pages of the author.

Searching for affiliation (institution or organisation)

Visitors may search for institutional

information, i.e. for information on institutions and organisations Mössbauer spectroscopists are affiliated with. To do so, go to the MEDCdir primary search pane and click the 'Search' button at the right-hand side of the 'Affiliation' text field:

Location: Home > Directory

Search conditions

Surname: First name:

Given name initials: Occupation:

Affiliation: Street or P.O.B.:

Postal code: Town:

Country: Phone:

E-mail: ResearchGate:

Google Scholar: ORCID:

ResearcherID: Scopus:

Fields:

- Archaeology and cultural heritage
- Biology, medical and forensic applications
- Catalysis, electrochemistry and corrosion
- Chemistry, structure and bonding
- Dynamics, inelastic scattering
- Earth sciences and mineralogy

Search result

A secondary search dialog box will pop up. Enter or select the search conditions (note than more countries separated by comma may be entered), then click the 'Search' button. Full information on the institutions and

organisations matching the search conditions will be shown in the scrollable result panel of the dialog box. The following example shows how to list public (governmental) universities in Hungary and Slovakia.

Search for affiliations

Name: Type:

Country:

If you cannot find your affiliation and you are a registered user, please create it by clicking 'Manage affiliations', otherwise send a mail to medc@dicp.cn.

	Name	Type	Country
1	Budapest University of Technology and Economics	University, governmental	Hungary
2	Eötvös Loránd University	University, governmental	Hungary
3	P.J. Šafárik University	University, governmental	Slovakia
4	Semmelweis University	University, governmental	Hungary
5	Slovak University of Technology in Bratislava	University, governmental	Slovakia
6	University of Debrecen	University, governmental	Hungary
7	University of Pécs	University, governmental	Hungary
8			

50 Page 1 of 1 Displaying 1 to 8 of 8 items

Should visitors not be able to find an institution or organisation which is or can be related to Mössbauer spectroscopy they may initiate creating new institutional profiles (cf. the section ‘Managing affiliations’) or may contact the MEDCdir admin at medc@medc.dicp.cn.

4.2. Registering on MEDCdir

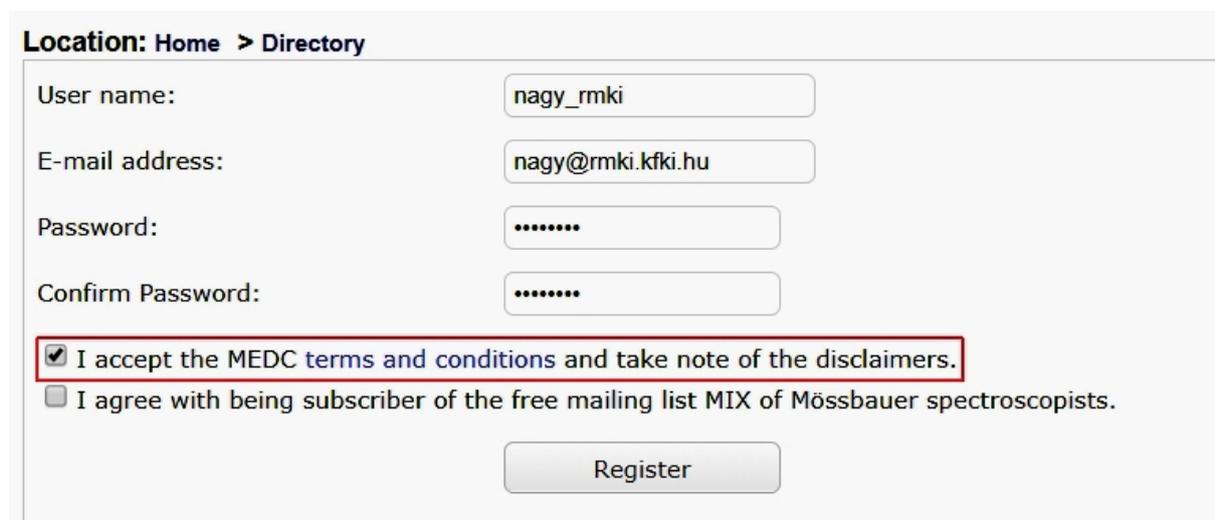

Any visitor may register on MEDCdir to create an account and, thereby, to be-come a MEDCdir user. Users will be able to create their MEDCdir personal profiles and also to initiate creating new institutional profiles (i.e. affiliations) or to modify existing ones.

To register, go to the main page <http://www.medc.dicp.ac.cn/directory/> of MEDCdir. Click the word ‘here’ of the clause ‘please click here to register now’ in the right pane:

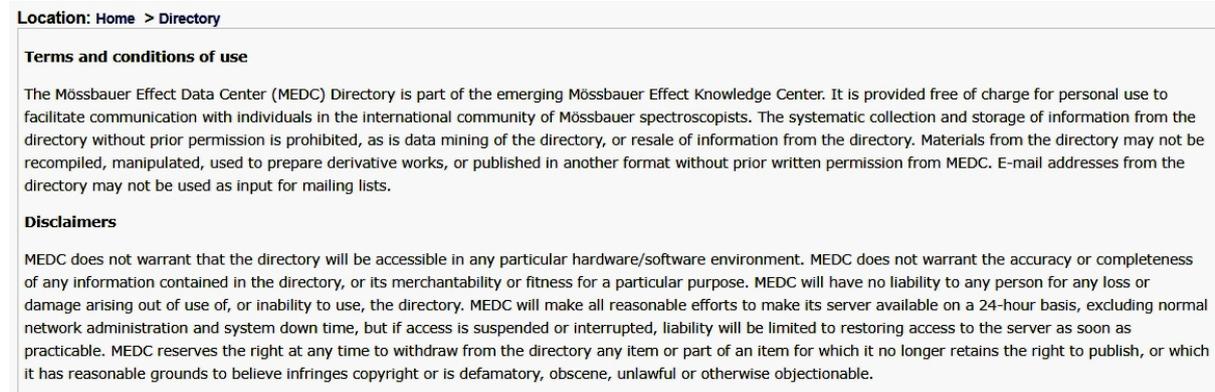

You will be navigated to a new page where your user name, e-mail address and password has to be specified; for details see the section

‘Personal information’. Please make sure to tick the checkbox at ‘I accept the MEDC terms and conditions and take note of the disclaimers’.

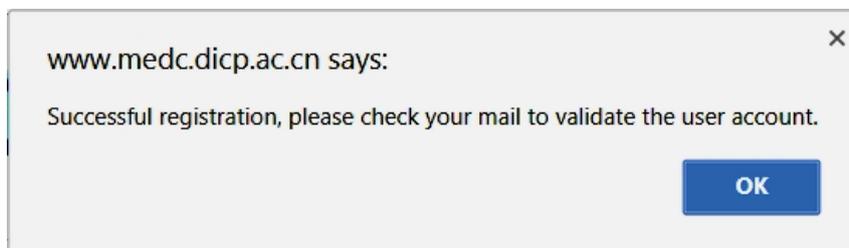

You may wish to read the MEDC terms and conditions by clicking ‘terms and conditions’.

By ticking the checkbox at ‘I agree with being subscriber of the free mailing list MIX of Mössbauer spectroscopists’ you entitle the MEDC staff to register you as a subscriber of the free international mailing list of Mössbauer spectroscopists MIX (<https://mailman.kfki.hu/sympa/info/mix>) recognised by IBAME. The registration by the MEDC staff is not

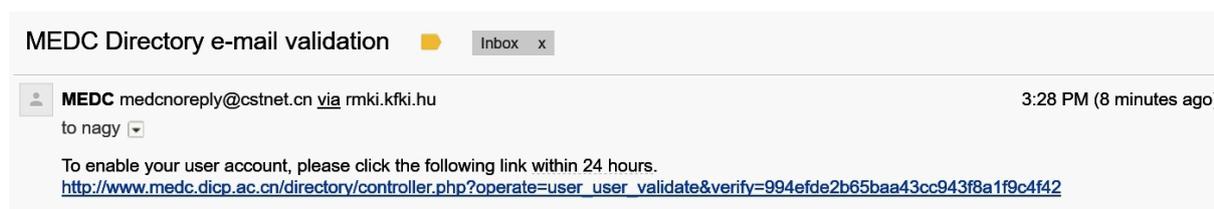

automatic; it may take several weeks or longer. Therefore, Mössbauer spectroscopists are encouraged to subscribe MIX directly by visiting the MIX management page.

Having clicked the ‘Register’ button, a message confirming your successful registration will pop up:

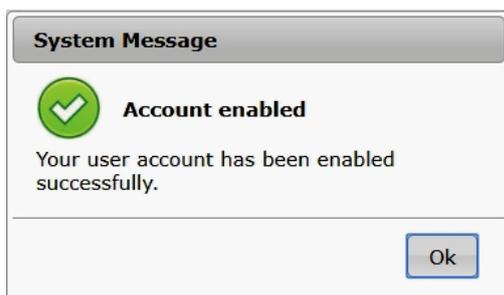

At this stage, your registration is still conditional; it should be confirmed within 24 hours. To do so, check your mailbox belonging to the e-mail address which you specified when

starting the registration. In your mailbox you should find an e-mail sent by `medcnoreply@cstnet.cn` containing the validation link:

Click the validation link within 24 hours. This will make your MEDCdir user account enabled, an action confirmed in a subsequent pop-up message:

By clicking ‘OK’, you will be directed to the MEDCdir main page in the right pane of which you will be able to log in with your user name and password and will be able to create (and, later, to modify) your personal profile (i.e. your ‘electronic business card’, your author entry). For details see the next section (‘User’s actions’).

As a rule, the validation e-mail will arrive within a couple of minutes. Should you not receive the validation e-mail within about one

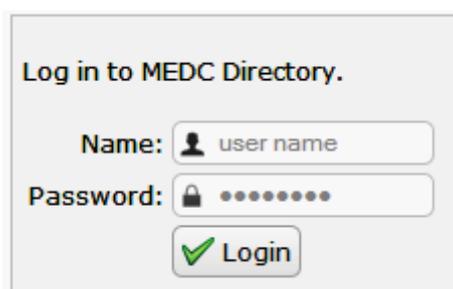

hour, please check your spam mail folder. To be on the safe side, you may wish to put the address `medcnoreply@cstnet.cn` to the white (exemption) list of your spam filter beforehand.

Should you not find your validation e-mail in your mailer or should you experience other problems (e.g. MEDCdir system error messages) during the registration process, please contact the MEDCdir admin at `medc@dicp.ac.cn`.

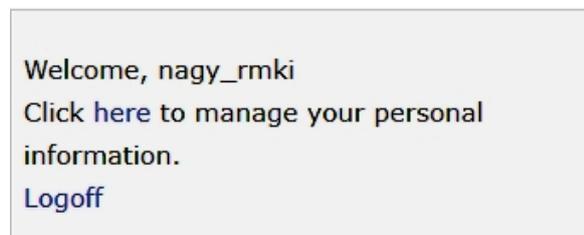

5. User’s actions

5.1. Logging in to a user account

Registered users can login with their user name and password in the right pane of the MEDCdir main page.

Having clicked the 'Login' button, the right pane will change and a welcome message will be shown:

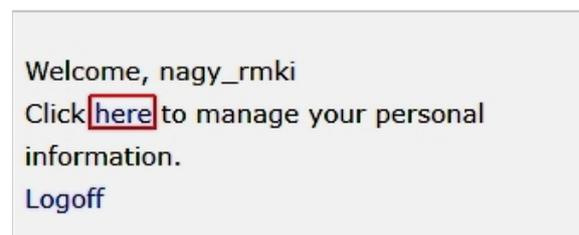

5.2. Creating and editing your personal profile

Creating and later editing your personal profile is the most important and, as a rule, the first action of a new MEDCdir user. Indeed, registering on MEDCdir as a user without creating your own personal profile makes little sense since searching MEDCdir personal profiles is possible for any visitor without

registration anyway. Remember that, as a MEDCdir user, you serve the international Mössbauer community only by creating your own public MEDCdir personal profile.

To create your personal profile click the word 'here' in the welcome message that will be shown in the right pane after successful login:

You will be directed to the personal information console in the left pane of which you can select what to manage in your personal information:

Location: Home > Directory > Personal information

Personal information <<	
User's actions >>	Required fields are marked with a red asterisk (*) and must be filled in to complete the form.
Edit personal profile	Your author information is pending for review
Change password	Surname:* <input type="text" value="Mouse"/>
Change e-mail address	First name:* <input type="text" value="Michael"/>
Change auxiliary information	Middle name: <input type="text"/>
Manage affiliations	Given name initials:* <input type="text" value="M."/>
Author's actions >>	Title:* <input type="text" value="Mr"/> ▼
Edit photo	Informal name: <input type="text" value="Mickey"/>
	Year of birth: <input type="text" value="1928"/>
	Occupation:* <input type="text" value="PhD student"/>
	Highest degree: <input type="text"/>
	Institution awarding degree: <input type="text"/>
	Year of degree: <input type="text"/>
	Affiliation:* <input type="text" value="Princeton University"/> <input type="button" value="search"/>
	Department or group: <input type="text"/>
	Position: <input type="text"/>
	Street or P.O.B.:* <input type="text" value="P.O. Box 10,000"/>
	Postal code:* <input type="text" value="32830"/>
	Town:* <input type="text" value="Lake Buena Vista, FL"/>

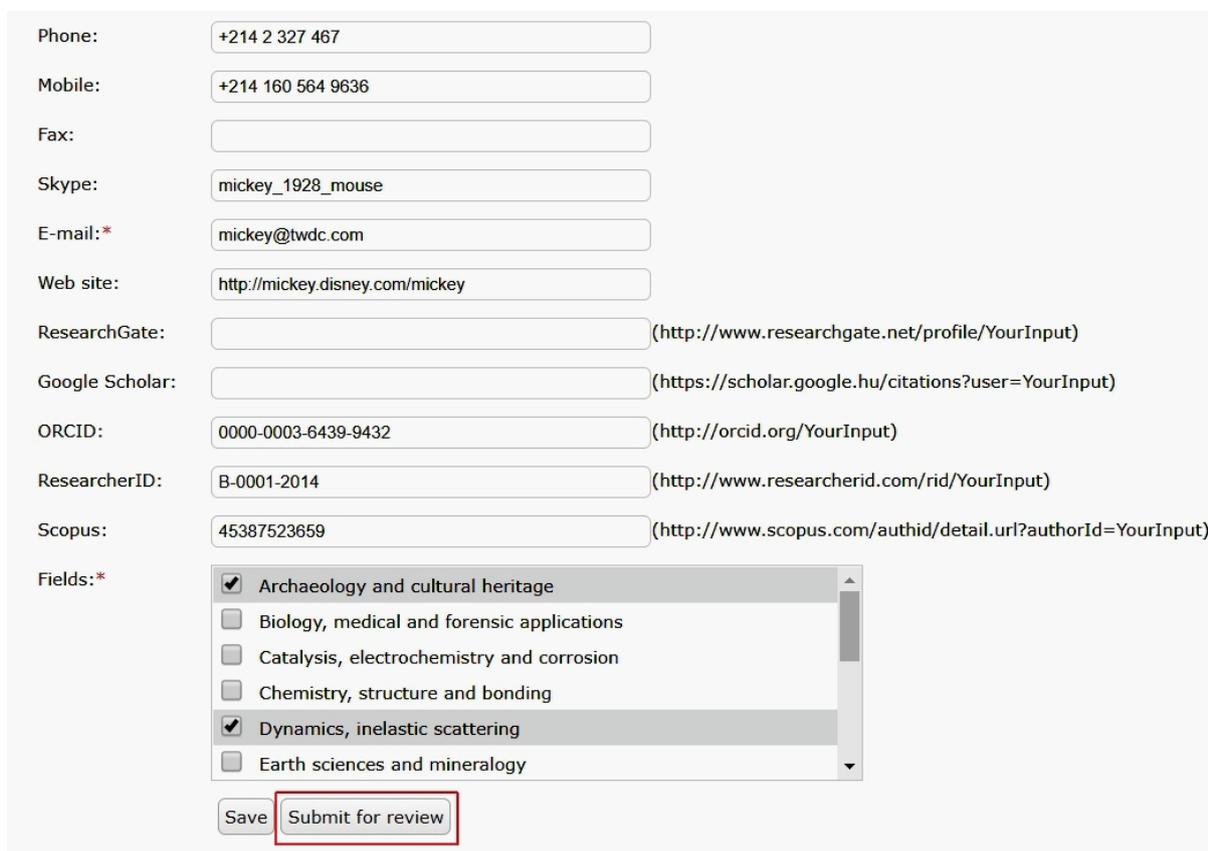

By default, an empty personal profile template will appear in the main pane of the personal information console. Should you have

chosen selecting other items of the 'User's actions' section in the left pane first, you may return to the personal profile template by

clicking 'Edit personal profile' in the left pane any time.

Fill in the template with your data. For details, please refer to section 'Personal information' and, as concerning how to select your affiliation, to section 'Searching for affiliation (institution or organisation)'. You may save your work any time as a draft by

clicking the 'Save' button at the bottom of the page. Please make sure to click the button 'Submit for review' when you have completed filling in the template. Re-member that merely saving your work will not initiate reviewing it by the MEDCdir admin. To initiate reviewing, please tick the 'Submit for review' button.

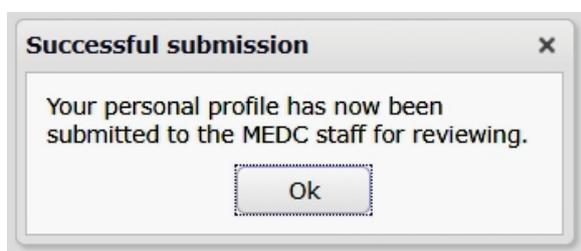

The screenshot shows a form for editing a personal profile. It includes the following fields:

- Phone: +214 2 327 467
- Mobile: +214 160 564 9636

At the bottom, there are two buttons: 'Save' and 'Submit for review'. The 'Submit for review' button is highlighted with a red box.

The successful submission of your personal profile will be acknowledged in a pop-up message:

The submission will initiate reviewing your personal profile by the MEDC staff, a process typically taking a couple of working days. The MEDC staff will correct minor formal errors or will contact you in case of major issues. Following the review, your personal profile will be published and, thereby, you

will become an author. Authors are eligible to perform author's actions, i.e. changing their personal profile and adding or changing photos (personal portraits). Please check after some time if your submitted personal profile has already been published since no special notification on the publication will be sent you.

Authors can modify their personal profile template exactly the same way as described above. Please make sure to click the button 'Submit for review' when you have completed editing the template. Your author status will not be suspended by this action, however your public personal profile will show its old content for visitors and users as long as the modifications will not have been approved by the MEDCdir admin.

5.3. Forgotten password

Please refer to the electronic version of the

MEDCdir Users' Guide [9].

5.4. Changing the password

Please refer to the electronic version of the MEDCdir Users' Guide. [9]

5.5. Changing the e-mail address

Please refer to the electronic version of the MEDCdir Users' Guide. [9]

5.6. Changing the auxiliary information

Please refer to the electronic version of the MEDCdir Users' Guide. [9]

5.7. Managing affiliations

By clicking 'Manage affiliations' in the left pane of the personal information console, the user affiliation management page will appear in the main pane:

The screenshot shows a web interface for managing personal information. At the top, the breadcrumb navigation reads "Location: Home > Directory > Personal information". On the left, there is a sidebar menu with sections: "Personal information" (with a double-left arrow), "User's actions" (with a double-down arrow), and "Author's actions" (with a double-down arrow). Under "User's actions", the following options are listed: "Edit personal profile", "Change password", "Change e-mail address", "Change auxiliary information", and "Manage affiliations". Under "Author's actions", the option "Edit photo" is listed. The main content area is titled "Affiliation list" and contains three buttons: "Search existing affiliation" (with a green plus icon), "Create" (with a green plus icon), and "Update" (with a green pencil icon). Below the buttons is a table with a single header row labeled "Name" and an empty body.

By clicking 'Search existing affiliation' the 'Search for affiliations' dialog will pop up; for its function refer to the section 'Searching for affiliation (institution or organisation)'.

Should you not find an institution or organisation that you wish to use as an

affiliation you may either initiate creating a new affiliation by clicking 'Create' or you may contact the MEDCdir admin at medc@dicp.ac.cn to create it for you. If you choose clicking 'Create', the 'Create a new affiliation' dialog will pop up:

The screenshot shows a dialog box titled "Create a new affiliation" with a close button (X) in the top right corner. The dialog contains the following fields and controls:

- Name:** A text input field with an asterisk (*) indicating it is required.
- Type:** A dropdown menu with "Please select" as the current selection.
- Street:** A text input field.
- Postal code:** A text input field.
- Town:** A text input field.
- Country:** A dropdown menu with "Please select" as the current selection.
- Web site:** A text input field.

At the bottom of the dialog, there are three buttons: "Save", "Post for review", and "Cancel".

Fill in the fields and click 'Post for review':

Create a new affiliation

Name: Saint Petersburg State University *

Type: University, governmental

Street: University Embankment 7/9

Postal code: 199034

Town: Saint Petersburg

Country: Russia

Web site: http://english.spbu.ru/

Buttons: Save, **Post for review**, Cancel

A pop-up message will confirm that the new affiliation has been submitted to the MEDCdir admin for reviewing it:

Once you have initiated creating a new affiliation, it will appear in the user affiliation management page in the list of your affiliations, however, you (or others) will only be able to use it once it will have been approved by the MEDCdir admin, i.e. when its status will have changed from 'post for review' to 'pass'. As a rule, this may take a few working days.

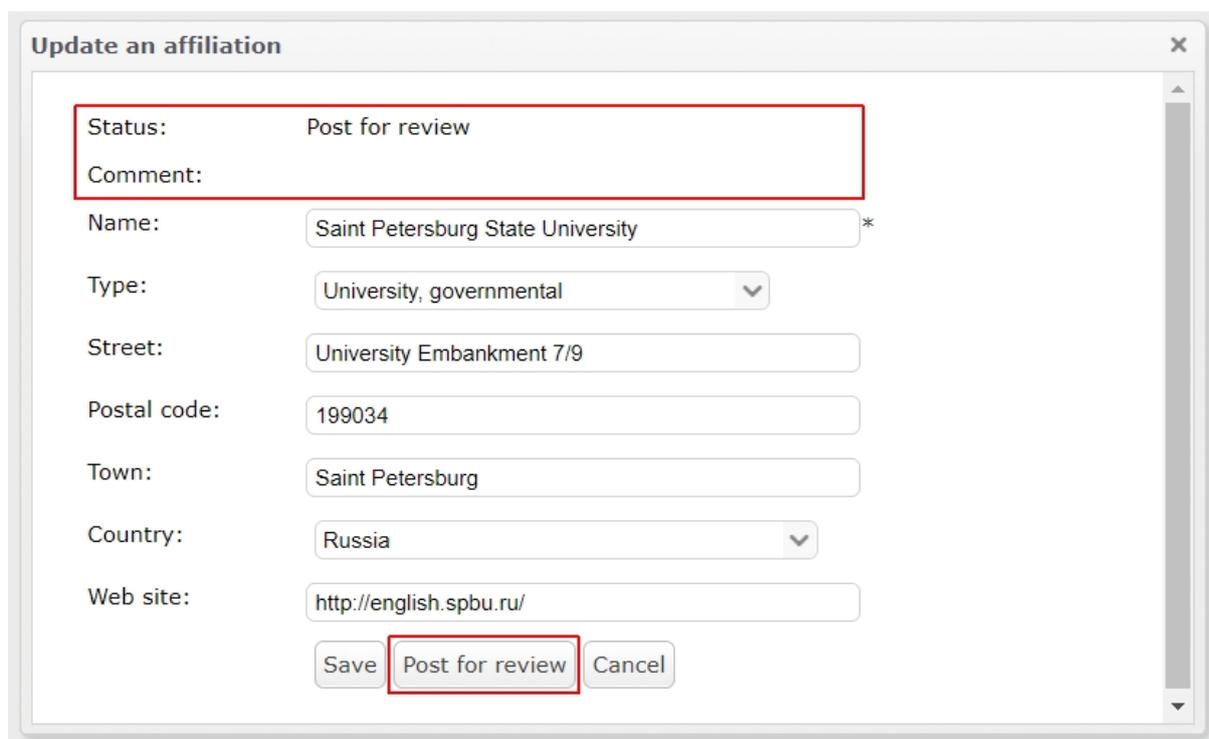

Location: Home > Directory > Personal information Current Date: 2017-11-04 Current User: nagy_rmk Logoff

Personal information		Affiliation list			
User's actions		Search existing affiliation Create Update			
		Name	Type	Country	Status
Edit personal profile Change password Change e-mail address Change auxiliary information Manage affiliations		1 Saint Petersburg State University	University, governmental	Russia	Post for review
Author's actions					
Edit photo					

To update an item in the list of your affiliations, select it in the list, then click the ‘Update’ button.

You will see the status of your affiliation and, possibly, the MEDCdir admin’s comment:

Update your information then post it for review.

You may save your work any time, however, merely this will not initiate reviewing it by the MEDCdir admin. To initiate reviewing, please tick the ‘Post for review’ button.

6. Author’s actions

6.1. Adding or changing your photo

Please refer to the electronic version of the MEDCdir Users’ Guide. [9]

7. Acknowledgements

Thanks are due to Mr. Jie Hou for developing the MEDCdir server web application. D.L.N. gratefully acknowledges the financial support by the Chinese Academy of Sciences in frames of the grant PIFI 2013T2G0009.
